---> Comment Text :

1 [President Bush appears poised to approve Nevada's Yucca Mountain as a storage site for high-level nuclear waste, even though the region is earthquake-prone. In addition, water flows beneath the mountain, so it could infiltrate the waste containers, corrode them and carry radioactive waste into the groundwater.]

2 [The US has plentiful sources of clean, safe, reliable, and economical energy. these sources include wind power, solar power, plus biomass and biogas. Futhermore, a hydrogen-electric economy is well on its way to becoming a reality.]

Nuclear power is costly, dangerous, dirty, and a disgrace to our future generations.]
